

PRACTICAL NO: 01

Creating account, repository on GitHub and cloning repository in GitHub page.

A: first of all go to github.com and then create your account in gitub.

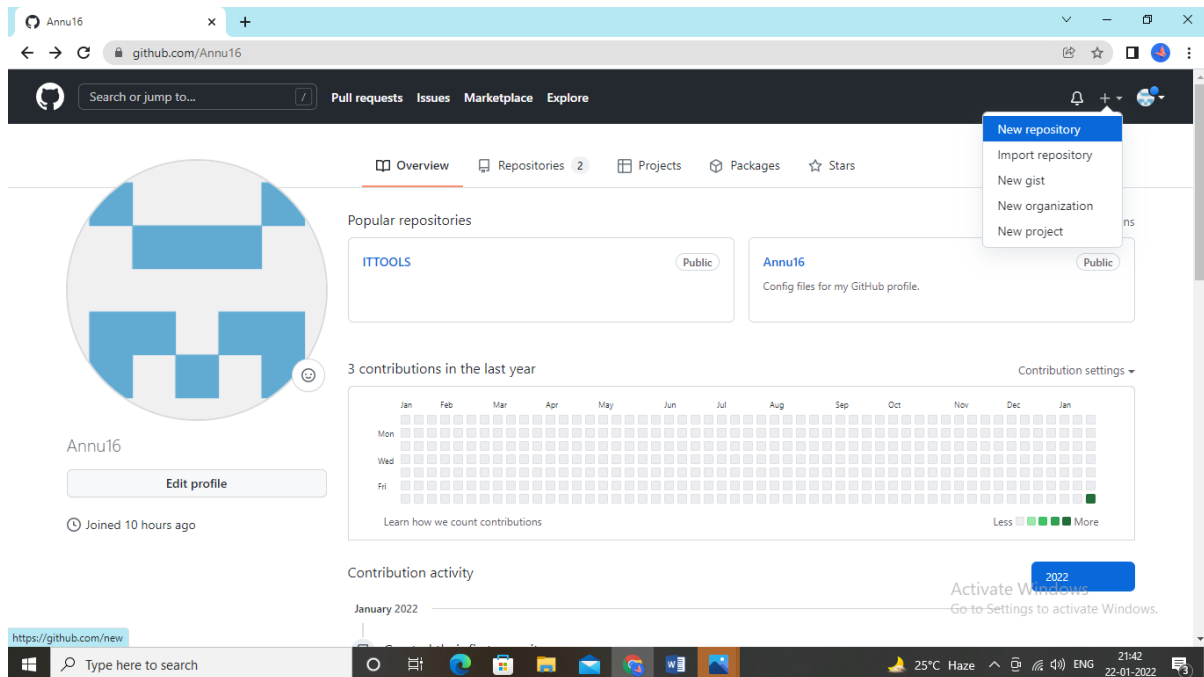

B: creating repository:

step 1: login to github account .

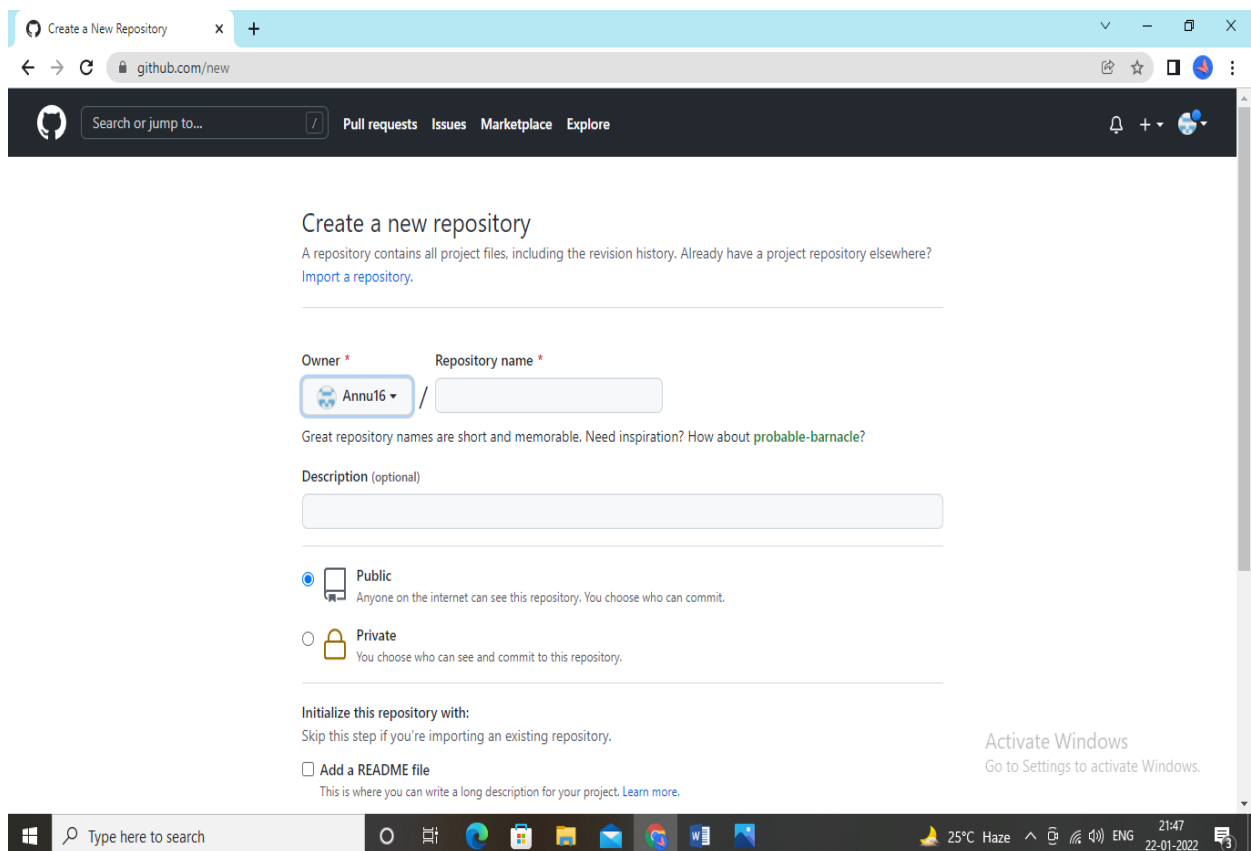

step 2: click to sign in.

The screenshot shows a web browser window displaying the GitHub profile of a user named 'Annu16'. The browser's address bar shows 'github.com/Annu16'. The GitHub navigation bar at the top includes a search bar, 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The user's profile section on the left features a circular avatar with a blue and white pixelated pattern, the username 'Annu16', an 'Edit profile' button, and a note 'Joined 10 hours ago'. The main content area is titled 'Overview' and shows 'Popular repositories' with two entries: 'ITTOOLS' and 'Annu16' (a repository for configuring GitHub profile files). Below this, a '3 contributions in the last year' section displays a calendar grid for January 2022, with a legend indicating contribution levels from 'Less' to 'More'. At the bottom, a 'Contribution activity' section shows a timeline for January 2022. A Windows taskbar is visible at the very bottom, showing the search bar, taskbar icons, and system tray information including '25°C Haze', 'ENG', and the time '21:35 22-01-2022'.

Step 3: to create new repository then click on new repository.

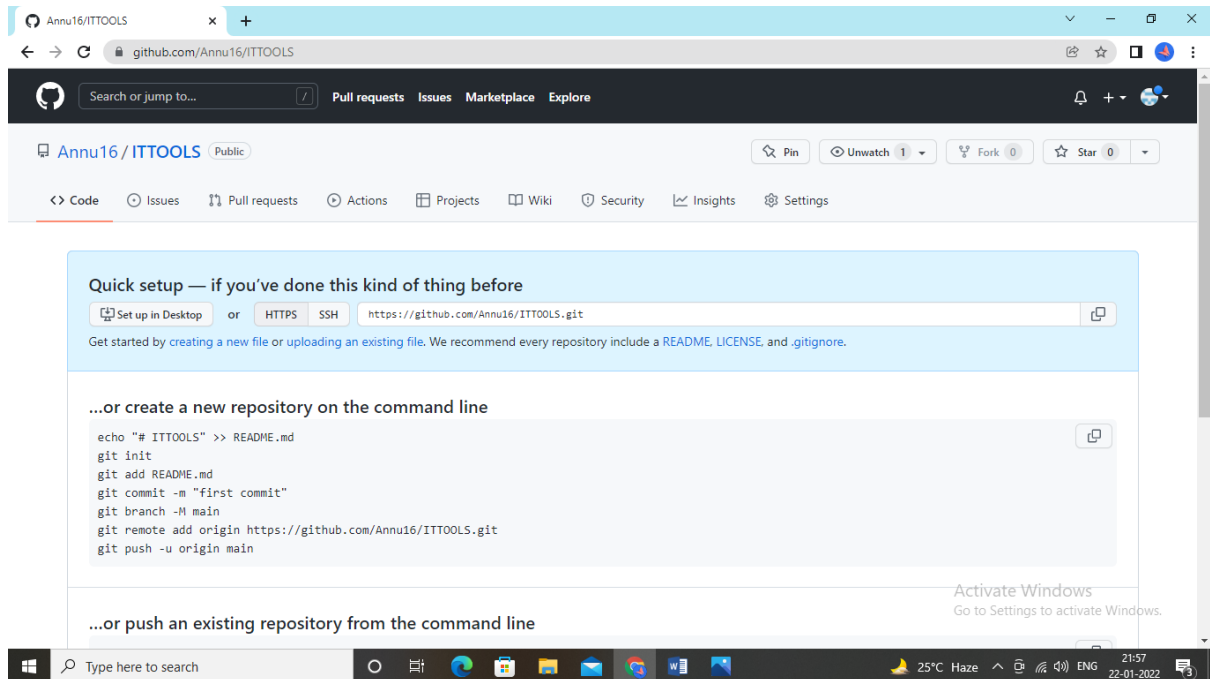

Step 4: create repository dia;og box will appear.
