

PRACTICAL NO:01

Creating account, repository on GitHub and cloning repository in GitHub page.

A: first of all go to github.com and then create your account in gitub.

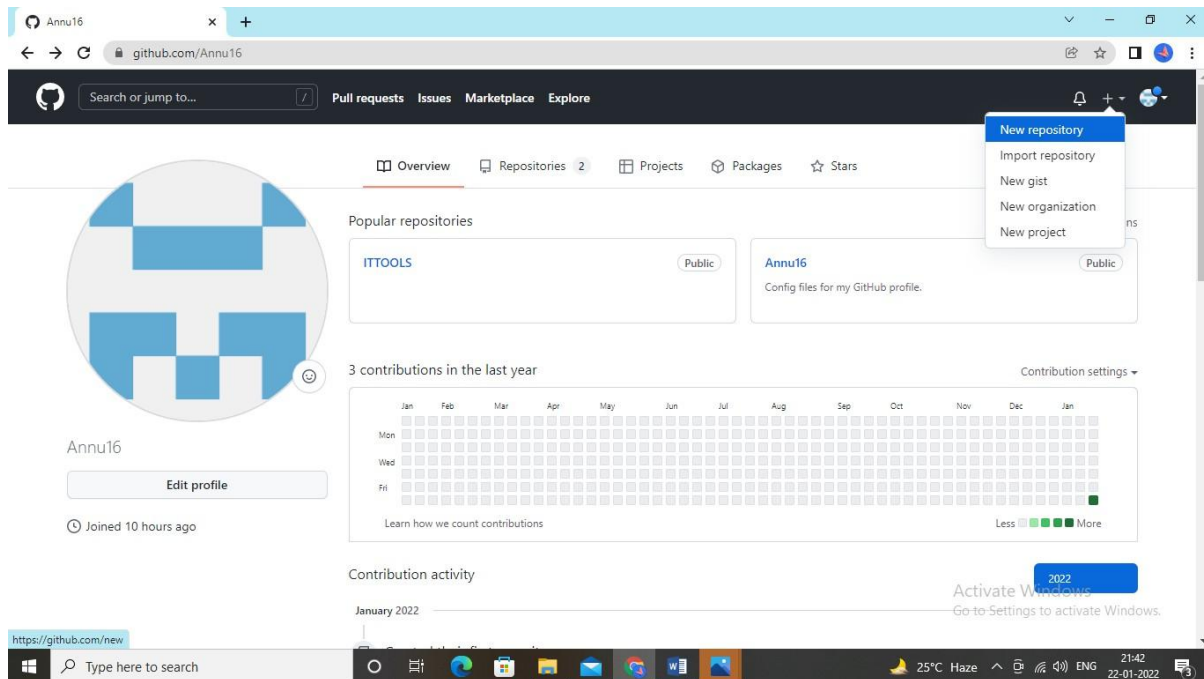

B: creating repository:

step 1: login to github account .

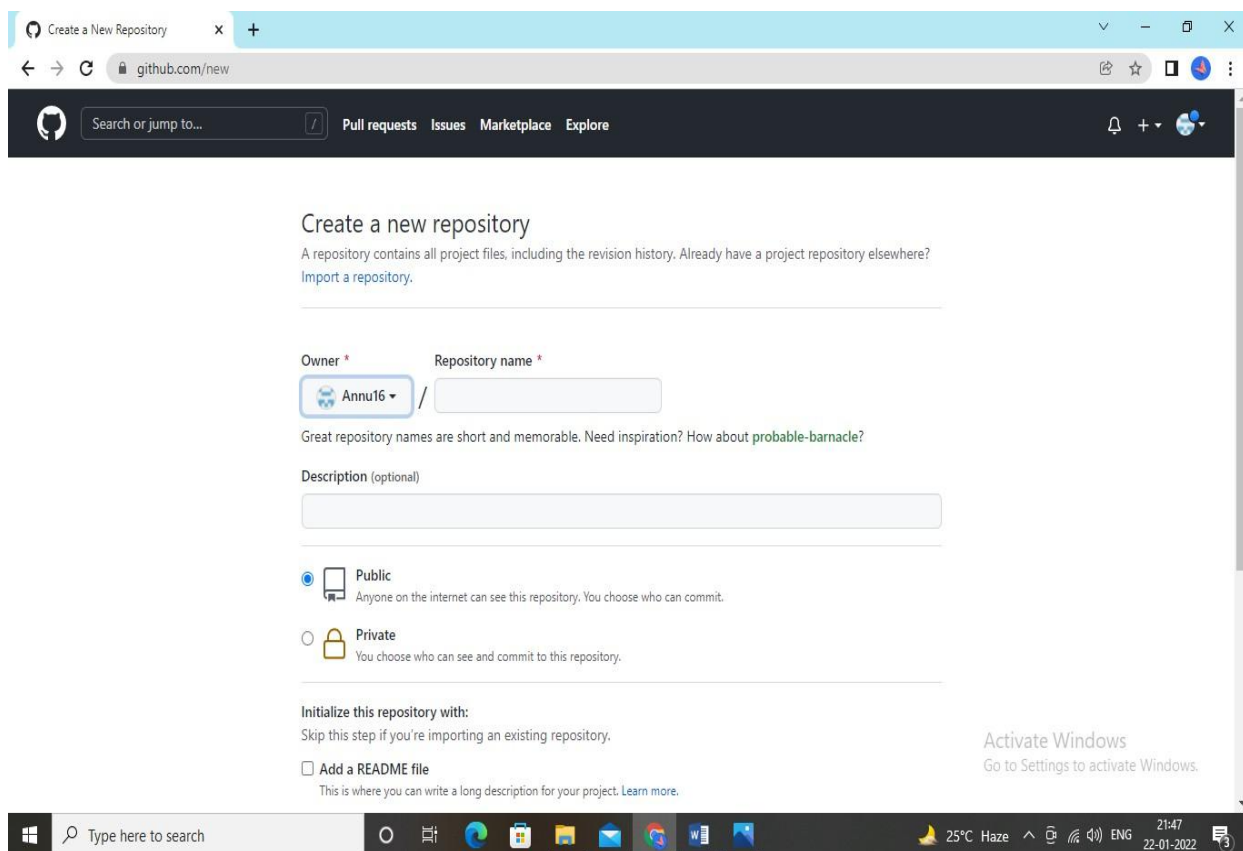

step 2: click to sign in.

The screenshot shows a web browser window displaying the GitHub profile of a user named 'Annu16'. The browser's address bar shows 'github.com/Annu16'. The GitHub navigation bar at the top includes links for 'Pull requests', 'Issues', 'Marketplace', and 'Explore'. The user's profile section on the left features a circular avatar with a blue and white checkered pattern, the username 'Annu16', an 'Edit profile' button, and a note 'Joined 10 hours ago'. The main content area is titled 'Overview' and shows 'Popular repositories' with two entries: 'ITTOOLS' and 'Annu16' (both public). Below this, a '3 contributions in the last year' section displays a calendar grid for January 2022, with a legend indicating contribution levels (Less, More). The 'Contribution activity' section shows a timeline for January 2022. A Windows taskbar is visible at the bottom, showing the date as 22-01-2022 and the time as 21:35.

Step 3: to create new repository then click on new repository.

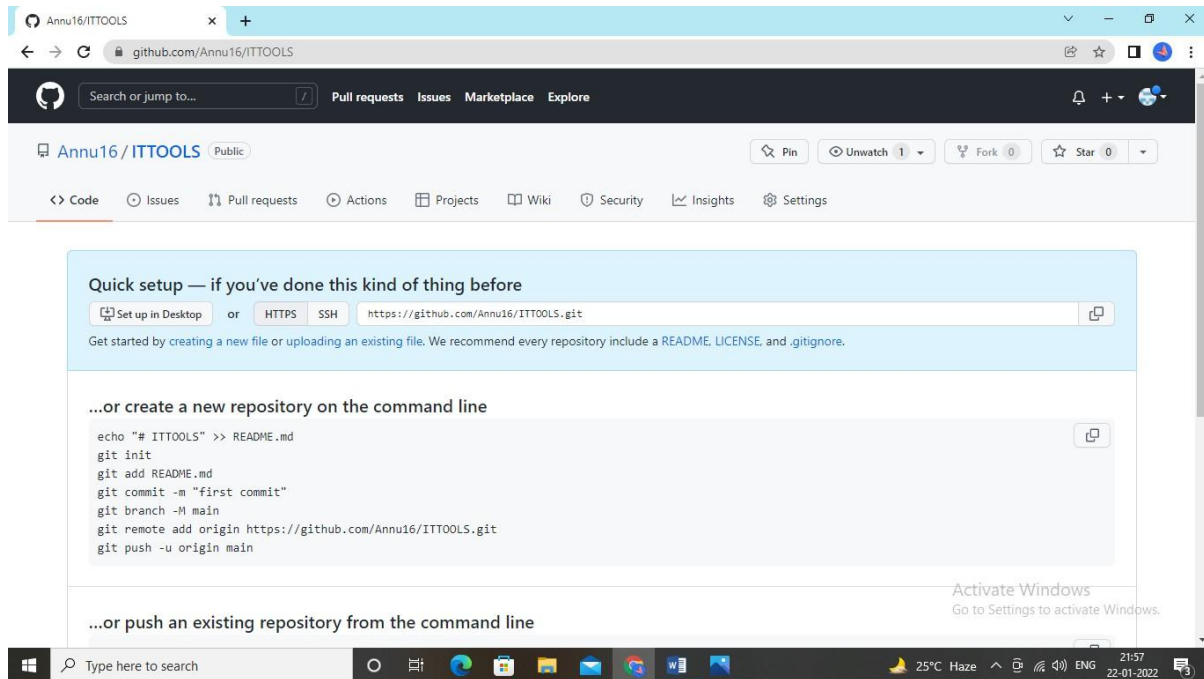

Step 4: create repository dialog box will appear.

Step 5: Give name to repository and repository button.

Now Repository created

C: Clone repository

To clone repository , copy link and share it .
